About

Holyrood Connect is Scotland's leading provider of content focused on public sector data protection and security.

As this year's conference has been moved online to ensure the safety of our delegates you'll have access to the same cutting-edge content you'd expect from our Public Sector Data Protection conference - including keynote presentations, a virtual roundtable, good practice case studies and interactive panel discussions - all from the comfort and safety of your own home or office!

The Event

Holyrood's Public Sector Data Protection conference provides an invaluable opportunity to come together with colleagues across the sector and build a clear strategic understanding of how to remain compliant, and how to leverage data protection and security to benefit your organisation.

You'll hear from expert speakers and thought leaders from across the United Kingdom, who will provide practical examples of good practice in overcoming challenges related to implementing both GDPR and the Data Protection Act.

The event is free-to-attend for those in the public sector and delegates will be eligible for up to six CPD points (depending on participation levels) so register now to secure your place.

Our Virtual Platform

Our virtual platform is cloud-based, secure and easy-to-use. The platform requires no plugins or downloads, so you can stream content without any barriers.

The in-built audience interaction and polling tools will allow you and your fellow delegates to play an active role throughout the conference.
